

**FULFILLING THE FUTURE**  
THROUGH CLIENT CENTRIC SOLUTIONS

## REVERSE LOGISTICS

Carter's innovative methodology of Reverse Logistics leverages the integration of Conveyance Technology and Workstation Optimization to effectively and efficiently process returned products.

## TOTAL SYSTEM THINKING

Carter's Reverse Logistics strategy is a Total System Thinking approach to deliver a thoughtfully engineered material handling system that allows clients to get the exact support they need, from assessing current operations to designing and installing a reverse logistics solution. Our clients choose to engage us from the point of initial planning through to the implementation of the final solution.

## THREE DISCIPLINES

### Safety

The incorporation of people and machinery to promote a safe, secure, and efficient work environment.

### Ergonomics

The optimization of workstation cells in relation to people, tools, and conveyance technology.

### Sustainability

The reclaiming of packaging materials to be environmentally conscience and responsible in recycling efforts.
